Profile

I am a passionate Full-Stack Developer and UI/UX Designer skilled in delivering responsive, user focused web applications. I specialize in turning ideas into scalable digital solutions by combining intuitive design with efficient backend logic. With hands-on experience in AI-powered systems, I also leverage Generative AI and low-code tools to accelerate development. I thrive in collaborative environments and bring strong problem-solving, adaptability, and a commitment to delivering real-world, production-ready solutions.

Education

- | | |
|---|----------------|
| Higher National Diploma in Software Engineering
<i>EduClaaS Academy Litan</i> | 2024 – present |
| Pearson BTEC International Level 3 Foundation Diploma

Projects

- | | |
|--|-------------------|
| Full-Stack Developer
AI-Powered Sentiment Analysis <ul style="list-style-type: none">Built a customer review analytics tool that uses AI models from Hugging Face to detect and tag sentiment. Managed API integration, backend data handling, and built a clear, interactive frontend for real-time review processing and visualization. | 04/2025 – 05/2025 |
| Full-Stack Developer
LifeSync: AI-Personalized Wellness Plans <ul style="list-style-type: none">Developed a full-stack AI wellness application generating personalized fitness, nutrition, and mental wellness plans based on user input. Integrated OpenRouter AI APIs using prompt engineering, implemented robust API request handling, and designed a seamless, responsive interface for real-time feedback and data visualisation. | 03/2025 – 04/2025 |
| UI/UX Designer & Front-End Developer
Meals On Wheels (Team Project) <ul style="list-style-type: none">Led the UI/UX design and frontend development for a charitable food delivery platform. Designed user-friendly layouts in Figma and implemented responsive interfaces using React and Tailwind CSS. Collaborated closely with the backend team to integrate API endpoints and maintain cohesive user experiences. | 11/2024 – 12/2024 |
